SUMMARY

AI Engineering student (3rd year at ESPRIT) with a strong interest in Artificial Intelligence and intelligent systems. Skilled in C++/Qt, Python, and web development (PHP, Django, MVC), with hands-on experience building AI-enabled and data-driven applications. Known for creativity, teamwork, and a strong sense of purpose in developing impactful digital solutions supporting agriculture, environmental sustainability, and healthcare innovation.

EDUCATION

École Supérieure Privée d'Ingénierie et de Technologies (ESPRIT) Ariana, Tunisia
Engineering Degree (in progress) – Artificial Intelligence 2023 - Present
– 3rd-year student at ESPRIT, currently in the 1st year of specialization in Artificial Intelligence (engineering cycle).
– Focused on Machine Learning and Deep Learning, including model development, data preprocessing, and evaluation.

Lycée Kalaat El Andalous Ariana, Tunisia
Baccalauréat, Science Track (Session Principale) 2023

INTERNSHIPS

Société Tunisienne de Banque (STB) - Siège Tunis, Tunisia
IT Security Intern (DSSI) 2026 - Present
– Interning in the IT Security Department (DSSI), building a Django-based cybersecurity SOC (Security Operations Center) platform.
– Integrating machine learning models to classify Wazuh IDS security alerts and support analyst decision-making.

La Poste Tunisienne Kalaat El Andalous, Ariana, Tunisia
First-Year Internship (Stage de 1^{re} année) 2024
– Completed a first-year internship at the La Poste Tunisienne branch (agence) of Kalaat El Andalous.
– Gained exposure to postal financial services, customer operations, and day-to-day administrative processes.

PROJECTS

Deep Learning-Based Image Understanding & Text Extraction System | *Academic Project* 2026
– Developing a system using computer vision and CNN models for intelligent image analysis and classification.
– Integrating OCR technologies to extract and process text from complex document images.
– Strengthening skills in deep learning pipelines, model evaluation, and real-world deployment strategies.

Intelligent Voice-Based System for Digital Accessibility | *Hackathon Project (48H)* 2026
– Developed a voice AI platform enabling hands-free access to banking and e-commerce for users with disabilities.
– Integrated real-time speech recognition and biometric authentication for secure, seamless user interaction.
– Applied inclusive and AI-driven design principles to maximize usability and promote digital autonomy.

Machine Learning & Data Analytics for Job Market | *Academic Project* 2025
– Built an AI decision-support system using Machine Learning and Business Intelligence to analyze job market, financial, and marketing data.
– Developed ETL pipelines and a Data Warehouse; implemented ML models for classification, regression, and clustering.
– Designed Power BI dashboards delivering actionable insights on jobs, salaries, required skills, and company growth trends.

C++/Qt Developer – Medical Analysis System | *Academic Project* 2025
– Built a desktop application for complete medical analysis management including add, update, delete, search, and PDF export.
– Integrated Google Maps and IoT sensors for real-time laboratory location and data tracking.
– Implemented robust data validation and usability improvements ensuring smooth and reliable performance.

Software Developer – AgriClick Project | *Academic Project* 2024
– Developed a full-stack MVC web application for agricultural equipment rental and farming job offers.
– Implemented Front & Back Office modules including user management, complaints handling, admin dashboard, and data visualization.
– Integrated AI-driven features focused on sustainability, SDG alignment, and improved agricultural efficiency.

TECHNICAL SKILLS

Languages & Frameworks: C++, Qt Framework, Python, PHP, Django, SQL, MySQL
AI & Data: Machine Learning, Deep Learning, CNN, OCR, NLP, ETL Pipelines, Data Warehousing, Power BI
Other: IoT Systems, Arduino, MVC Architecture, Git, Data Visualization, Problem Solving & Debugging

CERTIFICATIONS

Generative AI with Diffusion Models (Certified) : NVIDIA Deep Learning Institute (2026)
Fundamentals of Deep Learning : NVIDIA Deep Learning Institute (2026)
Introduction to Modern AI : Cisco Networking Academy (2025)
Leadership and Social Impact Recognition (2025)

LANGUAGES

Arabic: Native | French: Fluent (B2) | English: Intermediate
